

MARVIS UTOMI

AI Business Operations Specialist | Process Improvement | Business Analysis | Operations & Front-of-House Coordination

London, UK | 07555212063 | utomimarvis@gmail.com | linkedin.com/in/[your-linkedin-handle] |

[\[https://marvisutomiporfolio.vercel.app/\]](https://marvisutomiporfolio.vercel.app/)

Open to UK-based, hybrid and fully remote roles worldwide | Freelance, contract, part-time or full-time | Available immediately

PROFESSIONAL SUMMARY

Operations professional retraining as an AI Business Operations Specialist on a 12-week applied accelerator, pairing a Higher National Diploma in Business Administration & Management with ten years running the controlled, documented, front-of-house operations that keep organisations moving. Across corporate and government sites in London, Abuja and Benin City, has owned access control procedures, incident and activity reporting, visitor and delivery logs, diary coordination and stakeholder handling — process discipline in environments where an undocumented step has real consequences. Formally trained in business analysis before joining the programme, and now converting that grounding into process mapping, workflow automation, KPI dashboards and AI governance on a live consulting case study for a five-site, 25-staff healthcare group. Calm under pressure, precise with records, and trusted around high-profile visitors and sensitive situations. Available immediately for UK-based, hybrid or fully remote work.

Target roles: AI Operations Specialist · AI Adoption / Enablement Coordinator · AI Business Analyst · Business Operations Coordinator · Operations Analyst · Process Improvement Assistant · Project Coordinator · PMO Assistant

SELECTED HIGHLIGHTS

- **Ten years of operations run to written procedure.** Access control, visitor and contractor logging, inbound and outbound delivery records, daily activity and incident reporting — auditable documentation produced consistently, shift after shift, across corporate and national-agency settings.
- **Trained in business analysis before the programme.** Completed formal Business Analysis training in 2021 and holds an HND in Business Administration & Management, giving her the vocabulary of requirements, stakeholders and process before the accelerator began.
- **Governance-first with AI.** Uses ChatGPT and Claude daily for research, analysis, process documentation and stakeholder communication — verifying every output for accuracy, tone and data sensitivity before it is shared.
- **Reliable in high-consequence situations.** Coordinated with law enforcement, emergency services and fire crews on escalated incidents; designated First Aider; SIA-trained in conflict management, physical intervention and civil and criminal law.
- **Front-of-house at volume.** Ran the reception of a government legislative office — heavy call volumes, high-traffic lobby, complaint resolution, and diary and event coordination in Microsoft Outlook and Google Workspace.

CORE COMPETENCIES

AI Enablement & Governance: Prompt Engineering · AI Use-Case Identification · Output Quality Review · Responsible AI Use & Governance · AI Vendor Due Diligence · AI Adoption Support

Operations & Improvement: Business Operations · Process Compliance · SOP Development & Adherence · Process Mapping · Workflow Automation · Incident & Exception Handling · Records Management

Analysis & Reporting: Business Analysis · Requirements Gathering · SWOT Analysis · Stakeholder Mapping · KPI Reporting & Dashboards · Data Analysis · Report Writing & Documentation

Delivery & Coordination: Project Coordination · Project Charters · Prioritisation · Scheduling & Diary Management · Executive Reporting & Presentations · Cross-Functional Collaboration

Stakeholder & Front-of-House: Reception Management · Visitor & Contractor Handling · Customer Relations · Complaint Resolution · Conflict Management & De-escalation · Multitasking Under Pressure

PROFESSIONAL EXPERIENCE & PRACTICAL TRAINING

AI Business Operations Specialist Programme — Cohort #1

July 2026 – September 2026

JesTech Academy (JesTech Solutions) | Remote, part-time trainee (8–10 hrs/week) — graduating 24 September 2026

- Selected for Cohort #1 of a 12-week applied accelerator: 8–10 hours weekly building 17 assessed portfolio deliverables for a single consulting client, evaluated on delivered work rather than written exams.
- Curriculum covers business operations, project management, business analysis, process improvement and workflow automation, AI governance, data analysis and dashboarding, professional communication and executive presentation.

- Apply ChatGPT and Claude across research, analysis, process documentation and client communication, quality-checking every output for accuracy, tone and data sensitivity before it is used.
- Deliver to a weekly professional rhythm — Monday briefs, midweek office hours, live cohort sessions and Sunday submission deadlines — consistently meeting deadlines remotely and without supervision.
- Bring a decade of procedure-driven operations into cohort work, translating real-world access control, logging and incident-reporting routines into the process mapping, SOP and governance frameworks taught on the programme.

CIS Security — Corporate Security Officer

Mar 2022 – Present

London, United Kingdom

- Operate site access control to a documented procedure — verifying, checking in and escorting visitors and contractors — maintaining an accurate, auditable record of everyone on site at any point in the day.
- Own the site incident record: log events precisely, communicate irregularities to management within the same shift, and give leadership a reliable evidence trail for decisions and follow-up.
- Run scheduled patrol routines against set procedure, checking premises, assets and life-safety provision, and flagging exceptions early rather than after they escalate.
- Act as first point of contact for visitors and staff, resolving queries on the spot and holding a calm, professional service standard in a busy corporate environment.
- Apply agreed protocols consistently to protect company assets against theft, fire and safety risk — the same compliance-first habit now carried into AI use, data handling and output review.

Nigeria Security & Civil Defence Corps — Security Concierge

Dec 2015 – Jul 2021

Abuja, Nigeria

- Maintained inbound and outbound logs for deliveries, shipments and vendors, and produced daily reports covering routine activity and notable incidents — records and reporting held to a national agency standard.
- Screened personnel, belongings and shipments against defined criteria, applying consistent checks to identify risk items and discrepancies across high volumes.
- Responded to enquiries and assistance requests from visitors and staff members, routing each to the right internal team and following through to resolution.
- Coordinated with law enforcement, emergency personnel and fire services on escalated situations, working across organisations under time pressure and reporting outcomes accurately.
- Served as designated First Aider and operated a range of alarm and monitoring systems, holding responsibility colleagues and visitors depended on daily.

Edo State House of Assembly — Front Desk Receptionist

Mar 2013 – Nov 2015

Benin City, Edo State, Nigeria

- Ran the front desk of a government legislative office — welcoming and directing clients and visitors to the right department, managing sign-in and sign-out records, and handling heavy call volumes in a high-traffic lobby.
- Coordinated schedules, appointments and events in Microsoft Outlook and Google Workspace, keeping multiple stakeholders' diaries aligned across a busy institution.
- Reviewed and updated information in the organisation's computer system, keeping records accurate, current and retrievable for colleagues who relied on them.
- Managed incoming and outgoing mail and deliveries, ordered office supplies and maintained consumables inventory, supporting efficient day-to-day office operations.
- Resolved client and guest complaints directly — listening, de-escalating and finding a practical outcome rather than passing the problem on.

PROJECTS & PORTFOLIO

Brightpath Health Clinic — End-to-End Business Transformation

July – September 2026

Consulting case study: 5 clinics, 25 staff, approx. £2m revenue, West Midlands, UK | 17-piece portfolio complete 24 September 2026

- **Operations audit** — diagnosed operational inefficiencies across manual scheduling, fragmented patient records and absent reporting, and quantified their combined impact as recoverable annual revenue, supported by a prioritisation matrix ranking every recommendation by impact, effort and urgency. *[insert your own £ figure once the audit is signed off]*
- **Project charter** — defined scope, milestones, risks, dependencies and success measures, giving the client sponsor a single reference for what would be delivered and when.

- **Business analysis report** — SWOT analysis and stakeholder mapping across clinical, administrative and leadership groups, translated into prioritised requirements.
- **Process mapping** — documented current-state workflows for patient scheduling and record-keeping, then designed the future state and the SOPs needed to run it.
- **Automation proposal** — specified AI and workflow automation for the highest-impact bottlenecks, with governance guardrails: human review points, data-handling rules and clear escalation.
- **KPI dashboard** — built a management dashboard in Looker Studio giving leadership visibility of utilisation, throughput and performance against target for the first time.
- **AI Governance Register & Vendor Due-Diligence Scorecard** — logged each AI use case against risk, ownership and data sensitivity, and scored candidate vendors on security, compliance, cost and fit to produce a defensible recommendation.
- **Executive pitch** — presented the full transformation case and roadmap to the client founder, structured for a non-technical audience and a funding decision.
- **Reusable AI assets** — a documented prompt library and workflow templates that let a team repeat the analysis without specialist support.

EDUCATION

- **Higher National Diploma, Business Administration & Management** — Auchi Polytechnic, Edo State, Nigeria | 2019 | Upper Credit (GPA 3.00)
- **Ordinary National Diploma, Business Administration & Management** — Auchi Polytechnic, Edo State, Nigeria | 2012
- **GCSE** — Pride College Secondary School, Edo State, Nigeria | 2008

PROFESSIONAL TRAINING & CERTIFICATIONS

- **AI Business Operations Specialist Programme** — JesTech Academy, Cohort #1 | in progress, graduating September 2026
- **Business Analysis** — Simplilearn | 2021
- **SIA Door Supervision** — BS Security Services, London (Security Industry Authority) | 2021 — covering conflict management, physical intervention, civil and criminal law, and communication and customer service techniques
- **Microsoft Office (Word, Excel, PowerPoint), CorelDraw and Internet Awareness** — Simplilearn | 2020
- **Designated First Aider** — workplace first aid responsibility held in post

TOOLS & TECHNOLOGIES

Working proficiency: ChatGPT · Claude · Microsoft Word, Excel, PowerPoint & Outlook · Google Workspace · Access control and CCTV monitoring systems · CorelDraw

Building expertise now in: Looker Studio · Lucidchart · Notion · Slack · Advanced Excel (pivot tables, Power Query) · Power BI · Workflow automation platforms (Power Automate / Make / Zapier)

Working style: UK-based, open to hybrid or fully remote delivery · comfortable across async written updates, video calls and shared documentation · fluent English.
